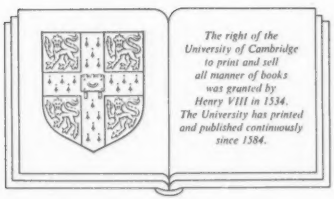
JOURNAL OF PLASMA PHYSICS

VOLUME 48

1992



CAMBRIDGE UNIVERSITY PRESS
Cambridge
New York Port Chester Melbourne Sydney

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR
DR J. P. DOUGHERTY
Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS
PROF. D. BERSHADER
Department of Aeronautics and Astronautics, Stanford University, Stanford, California 94305, *USA*

PROF. E. INFELD
Centre for Nonlinear Dynamics and its Applications, University College London, Gower Street, London WC1E 6BT

PROF. P. K. KAW
Institute for Plasma Research, Bhat, Gandhinagar 382 424, *India*

PROF. D. B. MELROSE
Research Centre for Theoretical Astrophysics, School of Physics, The University of Sydney, Sydney NSW 2006, *Australia*

PROF. G. J. PERT
Department of Physics, University of York, Heslington, York YO1 5DD

DR PADMA K. SHUKLA
*Institut für Theoretische Physik IV, Ruhr-Universität Bochum, D-*4630 *Bochum* 1, *Germany*

DR GARY P. ZANK
*Bartol Research Institute, University of Delaware, Newark DE*19716-4793, *USA*

Copying

This journal is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of $05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/92 $5.00 + .00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and Journals Department, 40 West 20th Street, New York, NY 10011–4211.

Three parts form a volume. The subscription price (which includes postage) of Volumes 47 and 48 (1992) is £130.00 net UK, per volume (US $249.50 in the USA and Canada) for institutions; £65.00 (US $180.00) per volume for individuals. Single parts cost £45.00 each (US $86.00 in the USA and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, NY, and at additional mailing offices. *POSTMASTER*: send address changes in USA, and Canada to *Journal of Plasma Physics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573–9864.

CONTENTS TO VOLUME 48

PART 1 AUGUST 1992

Editorial notice. J. P. DOUGHERTY 1

Second harmonic excitation of a Gould–Trivelpiece mode in a beam–plasma system. G. PRABURAM and A. K. SHARMA 3

An action principle for the Vlasov equation and associated Lie perturbation equations. Part 1. The Vlasov–Poisson system. J. LARSSON 13

Modelling of a plasma column sustained by a travelling circularly polarized electromagnetic wave ($m = 1$ mode) in the presence of a constant axial magnetic field. E. BENOVA, P. STAIKOV and I. ZHELYAZKOV 37

Exact solution of the dispersion equation for electromagnetic waves in sheared, relativistic electron beams. S. CUPERMAN and D. HERISTCHI 59

Nonlinear generation of the fundamental radiation in plasmas: the influence of induced ion-acoustic and Langmuir waves. F. B. RIZZATO and A. C.-L. CHIAN 71

The equations of reduced magnetohydrodynamics. G. P. ZANK and W. H. MATTHAEUS 85

Modulational instability of an ion wave packet in a cylindrical plasma-filled waveguide. B. GHOSH 101

Steady-state self-focusing of rippled laser beams in plasmas: arbitrary nonlinearity. M. S. SODHA, S. KONAR and K. P. MAHESHWARI 107

Intense propagation in a magnetized cold plasma: modulational instabilities of fully relativistic electromagnetic waves. R. E. KATES and D. J. KAUP 119

Nonlinear interaction of an intense electromagnetic wave with an unmagnetized electron–positron plasma. V. I. BEREZHIANI, L. N. TSINTSADZE and P. K. SHUKLA 139

Phase mixing and surface-wave decay in an inhomogeneous plasma. P. S. CALLY and Z. SEDLÁČEK 145

Effect of warm beam electrons on electrostatic shock solutions. M. DEY, U. N. DAS, K. S. GOSWAMI and S. BUJARBARUA 159

The kinetic theory of the nonlinear low-frequency response of a collisionless plasma to high-frequency electromagnetic radiation. YU. M. ALIEV, V. YU. BYCHENKOV, M. S. JOVANOVIĆ and A. A. FROLOV 167

PART 2 OCTOBER 1992

On driven, dissipative, energy-conserving magnetohydrodynamic equilibria. M. L. GOODMAN 177

Density-modulation effects on the propagation of an electromagnetic wave in a plasma. M. LONTANO and N. LUNIN 209

Quasi-one-dimensional model equations for plasma flows in high-pressure discharges in ablative capillaries. D. ZOLER and S. CUPERMAN 215

Sheath potential distribution in a plasma including negative ions. H. YAMADA and Z. YOSHIDA 229

Nonlinear MHD waves in a dissipative plasma with Hall dispersion and the modified Burgers–Schrödinger equation. S. V. KORSUNSKY 237

Effect of large Larmor radius on the stability of an infinitely conducting inhomogeneous plasma. N. KUMAR, K. M. SRIVASTAVA and V. KUMAR 245

Stimulated emission from a laser-wiggled electron beam travelling in an electrostatic wave. S. H. KIM 261

Thermodynamics of Vlasov equilibria. E. MINARDI 281

Lagrangian description and entropy of magnetic Vlasov systems. E. MINARDI 309

Waves with nonlinear polarization due to a self-generated magnetic field in a plasma. N. B. ALEKSIC, YU. M. ALIEV, V. YU. BYCHENKOV and S. VUKOVIĆ 325

Stability of electron inertia Alfvén solitons. P. FRYCZ, R. RANKIN and J. C. SAMSON 335

PART 3 DECEMBER 1992

Amplification of fast magnetosonic waves and the cut-off spectrum. I. M. RUTKEVICH and M. MOND 345

Amplification of magnetovortex waves in planar MHD flows. I. M. RUTKEVICH and M. MOND 359

Second-order oscillations of a Vlasov–Poisson plasma in Fourier-transformed velocity space. Z. SEDLÁČEK and L. NOCERA 367

Generation of large-amplitude plasma wakefields with low phase velocities by an intense short laser pulse. I. G. MURUSIDZE and L. N. TSINTSADZE 391

Nonlinear self-interaction of plasma electromagnetic pulses propagating obliquely to a very strong ambient magnetic field. R. E. KATES and D. J. KAUP 397

On vertical spinning Alfvén waves in a magnetic flux tube. L. M. B. C. Campos and N. L. Isaeva 415

Study of lower-hybrid wave propagation in the presence of low-frequency fluctuations. B. Fischer and M. Krämer 435

Velocity-shear instability of relativistic electron beams: a systematic exploration of the entire (ω, k) space. D. Heristchi and S. Cuperman 453

Numerical study of self-interaction of Bernstein waves by nonlinear Landau damping. M. Sugawa 465

The influence of ion streaming and weak relativistic effects on the modulational instability of ion-acoustic waves. E. J. Parkes 477

Alfvén surface waves along cylindrical annular streaming jets having a very dense fluid mantle pervaded by longitudinal magnetic fields. A. E. Radwan 487
